Complete Access Solutions for the Commercial Industry

Aluminium Shopfront

Aluminium shopfronts are designed to enhance business presentation while providing secure and functional customer entry. They maximise natural light and product visibility, helping attract customers and strengthen brand presence. Their durable construction and flexible design options allow businesses to create a professional and modern storefront while supporting accessibility and environmental performance.

Product offering:

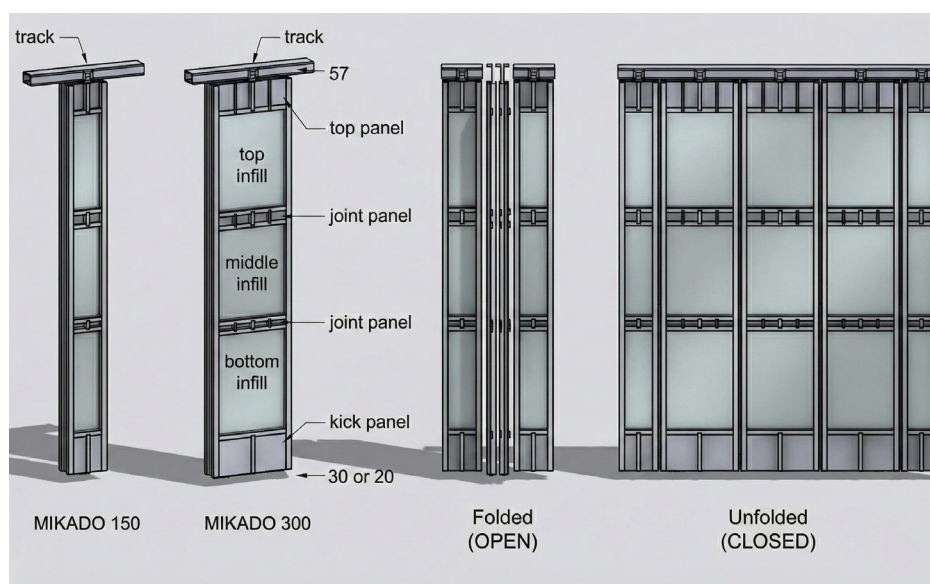

- Mikado Multi Folding Door
- Slimline Aluminium Shutter
- Arcade 2 Aluminium Roller Shutter
- Arcade 3 Aluminium Roller Shutter
- Clearspan Polycarbonate Roller Shutter

Roller Grilles

Roller grilles provide strong security protection without completely blocking visibility or airflow. They allow retailers to maintain product display after trading hours while protecting stock and assets. Their compact vertical operation makes them ideal for high-traffic retail environments where space efficiency and fast daily operation are essential.

Product offering:

- CASINO Aluminium Roller Grille
- Stadium Grille

Mikado Multi Folding Door

User-friendly aluminium folding doors with ventilation.

Standard

- Flexible aluminium folding shopfront designed for commercial, retail and hospitality environments
- Provides convenient access, ventilation and adaptable space utilisation
- Available in single or bi-parting configurations
- Designed to deliver both functional performance and strong visual appeal

Performance & Compliance

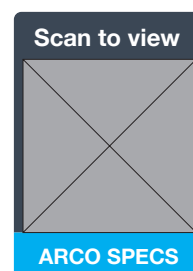

- Durable aluminium construction designed for high-traffic commercial environments
- Smooth sliding hardware ensures reliable daily operation
- Space-saving stacking improves layout flexibility and customer flow
- Impact-resistant infill panels maintain visibility and natural light
- Interlocking panel design enhances after-hours security

Application

- Retail shopfronts and shopping centre tenancies
- Cafés, restaurants and hospitality venues
- Commercial showrooms and display spaces
- Kiosks, entertainment venues and leisure facilities
- Indoor-outdoor commercial spaces requiring flexible access solutions

Technical Highlights

- Extruded aluminium panels with interlocking hinges and roller system for smooth operation
- Panels fold, slide and stack neatly into wall pockets to maximise usable space
- Optional curved track design allowing panels to travel around corners
- Effortless hand-push manual operation
- Panel width options of 150mm or 300mm
- Standard clear polycarbonate infill with optional solid or multi-hole aluminium panels for enhanced security
- Maximum height up to 4200mm with custom widths available
- Available in anodised or powdercoated finishes

Clearspan Polycarbonate Roller Shutter

High-performance security without compromising visibility.

Standard

- Modern roller shutter designed to combine security with product visibility for commercial and retail environments
- Built using clear polycarbonate panels interlocked with aluminium extrusions for strength and durability
- Allows businesses to showcase merchandise after trading hours while maintaining protection
- Designed to deliver both security performance and visual marketing value

Performance & Compliance

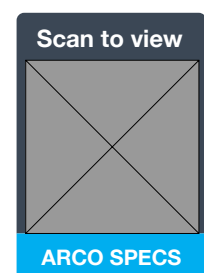

- Strong curtain construction provides reliable security for commercial premises
- Transparent panel design maintains product visibility without compromising protection
- Secure guide system supports smooth and consistent daily operation
- Durable materials designed for long-term commercial use with low maintenance requirements
- Flexible design supports compliance with retail and shopping centre operational requirements

Application

- Retail shopfronts and shopping centre tenancies
- Display areas requiring after-hours product visibility
- Food courts, kiosks and specialty retail outlets
- Commercial showrooms and merchandising spaces
- Locations requiring security without blocking light or visibility

Technical Highlights

- Durable interlocking curtain design with aluminium extrusions for structural strength
- Clear polycarbonate panels providing high visibility for after-hours display
- Full curtain coverage with secure side guides providing vermin protection
- Standard matt natural anodised finish with powdercoated options available
- Lift-out mullions available for wide openings or angled layouts
- Moulded end clips designed to prevent lateral movement and ensure smooth operation

Slimline Aluminium Shutter

Safeguard your business while maintaining function and style.

Standard

- The Slimline Aluminium Roller Shutter is designed for strong security, durability and modern aesthetic appeal in commercial environments
- Ideal for retail, hospitality, tourism, education and club facilities
- Provides reliable protection for fire hose reel cupboards, counters, bar tops and doorways
- Compact and versatile, suitable for a wide range of commercial applications
- Available in manual or motorised operation to suit operational requirements

Performance & Compliance

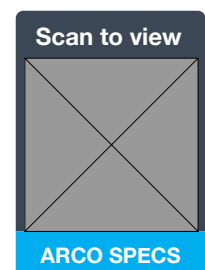

- Provides strong security and protection in high-traffic commercial areas
- Durable aluminium construction ensures long-term reliability
- Smooth operation reduces wear on components and minimises operational noise
- Complies with standard commercial safety and operational requirements
- Optional vision and ventilation features maintain airflow and visibility without compromising security

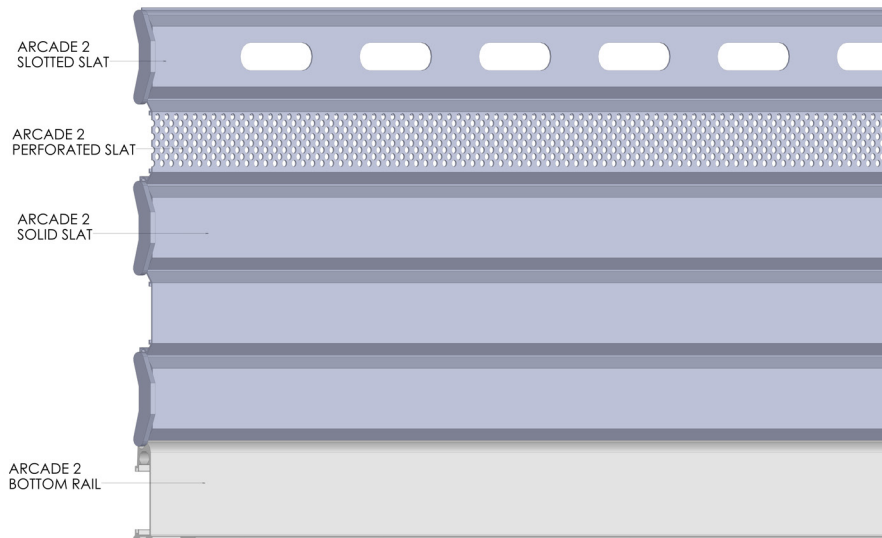

Application

- Retail shopfronts and service counters
- Hospitality venues including bars, cafés and restaurants
- Educational facilities and clubrooms
- Tourism and leisure facilities requiring secure closures
- Fire hose reel cupboards and internal partitions
- Doorways and openings requiring compact, durable security solutions

Technical Highlights

- Robust aluminium extruded slats (43mm x 1.4mm) for strength and longevity
- Suits openings up to 3m high by 3m wide
- Smooth and quiet operation with minimal maintenance requirements
- Optional vision panels or slotting for ventilation or partial visibility
- Finish options include anodised or powdercoated surfaces
- Customisable with mullions for wider or specialised openings
- Designed for daily commercial use with reliable performance

Arcade 2 Aluminium Roller Shutter

Versatile aluminium roller shutter for retail, hospitality and education applications (75mm)

Standard

- The Arcade 2 Aluminium Roller Shutter is a versatile, high-performance solution designed for retail, hospitality, education, tourism and club environments
- Combines strong security, durability and visual appeal with a bevelled external face for architectural styling
- Suitable for both internal and external applications, enhancing operational flexibility and space usage
- Available in manual or motorised operation to suit commercial access requirements

Performance & Compliance

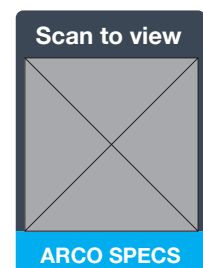

- Robust slat construction provides reliable security for high-traffic commercial applications
- Durable aluminium materials ensure long-term performance with minimal maintenance
- Flexible panel options maintain ventilation, visibility and dust control without compromising security
- Smooth operation supports daily commercial use and long service life
- Compliant with standard commercial safety and operational requirements

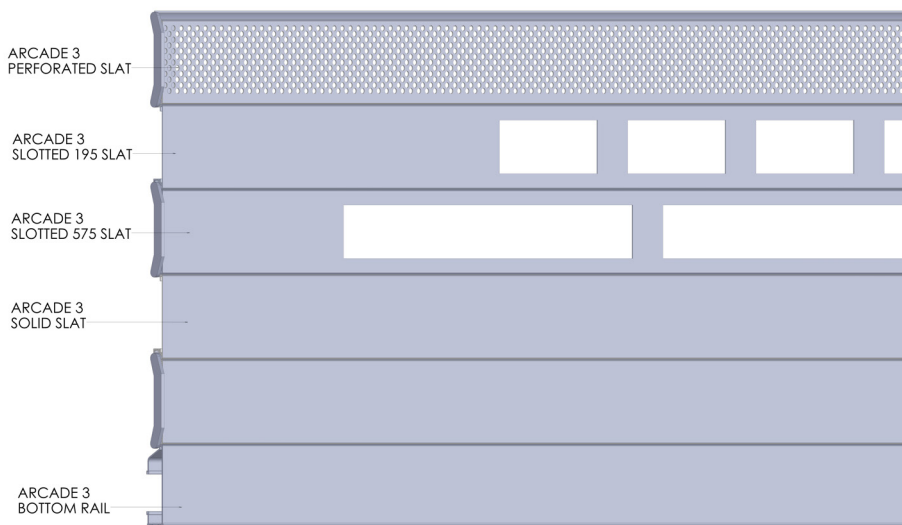

Application

- Retail shopfronts, kiosks and counters
- Hospitality venues including bars, cafés and restaurants
- Educational facilities and clubrooms
- Tourism and leisure spaces requiring secure and visually appealing closures
- Internal or external openings where security, airflow and visibility are needed

Technical Highlights

- Extended aluminium slats (75mm x 1.5mm) with bevelled faces for strength and aesthetic appeal
- Options for slotting, ventilation and vision panels to allow airflow, dust control, or visibility
- Smooth, low-maintenance operation with robust aluminium construction
- Suits openings up to 3m high x 3.0m wide for manual operation and up to 4.0m high x 5.5m wide for motorised operation
- Multiple mullion options for wide or angled openings
- Finish options include anodised or powdercoated surfaces to match architectural requirements

Arcade 3 Aluminium Roller Shutter

Ultra-strong aluminium roller shutter for large shopfronts and high-security applications (118mm)

Standard

- The Arcade 3 is a heavy-duty aluminium roller shutter engineered for high-security environments and large-scale openings
- Designed to provide strength, durability and functional protection while maintaining architectural appeal
- Ideal for retail, commercial, public and industrial facilities requiring robust security solutions
- Suitable for both manual and motorised operation, offering flexibility for various commercial access needs

Performance & Compliance

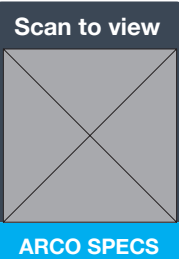

- High-strength slats provide reliable security for large commercial and public spaces
- Durable aluminium construction ensures long-term performance and minimal maintenance
- Smooth and secure operation for both manual and motorised applications
- Flexible infill and perforated options allow airflow, visibility and dust control without compromising protection
- Compliant with commercial and industrial operational standards, suitable for high-traffic environments

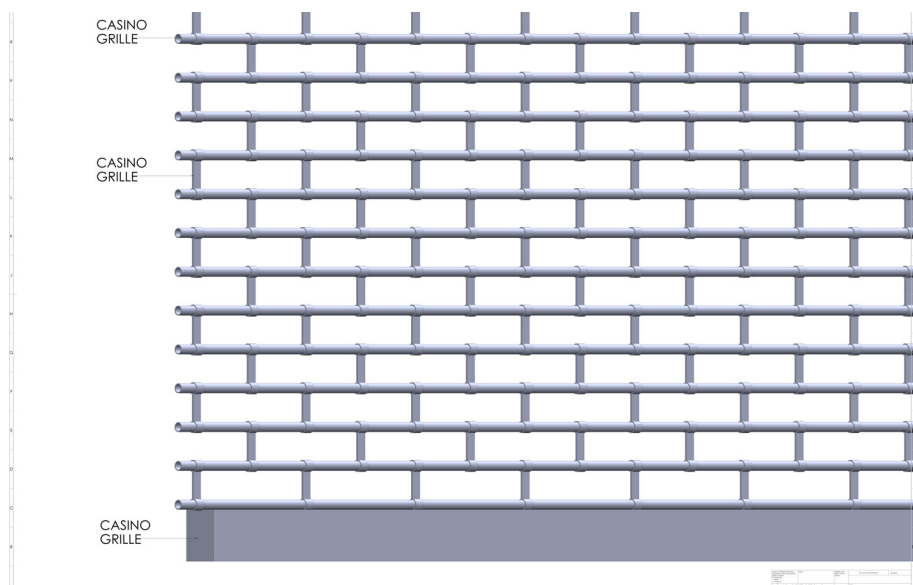

Application

- Large retail façades, shopping centres and kiosks
- Public facilities and civic buildings requiring high-security closures
- Industrial workshops, warehouses and loading bays
- Commercial sites needing single-span openings up to 10m wide
- Spaces requiring a combination of strength, visual appeal and ventilation

Technical Highlights

- 118mm x 1.4mm extruded aluminium slats with nylon end clips to reduce wear and extend service life
- Supports single-span openings up to 5m high and 10m wide
- Optional slotting or polycarbonate infills for ventilation and visibility
- Perforated slats available with 6.5mm holes at 9mm centres for airflow while maintaining security
- Wide range of motorisation and control options for high-cycle operation
- Anodised or powdercoated finishes to complement building aesthetics

CASINO Aluminium Roller Grille

Lightweight aluminium roller grille for secure retail and hospitality applications.

Standard

- Lightweight, all-aluminium security grille for retail and hospitality applications
- 12mm aluminium tubing with durable nylon link connectors in a brick-like pattern
- Attractive architectural finish for contemporary commercial spaces
- Manual operation standard (up to 3.6m H x 3.6m W), motorised option available for larger doors
- Finishes: anodised aluminium or custom powdercoating

Performance & Compliance

- Provides secure protection while allowing airflow, visibility and natural light
- Robust yet lightweight design for easy operation and long-term reliability
- Reduces operational strain and simplifies installation
- Corrosion-resistant aluminium construction suitable for internal and semi-exposed commercial areas
- Engineered for high-traffic commercial environments

Application

- Retail shopfronts
- Shopping centre tenancies
- Hospitality counters and bars
- Food court outlets
- Arcades and internal commercial walkways
- Ideal for operators needing a balance of security, presentation and practicality

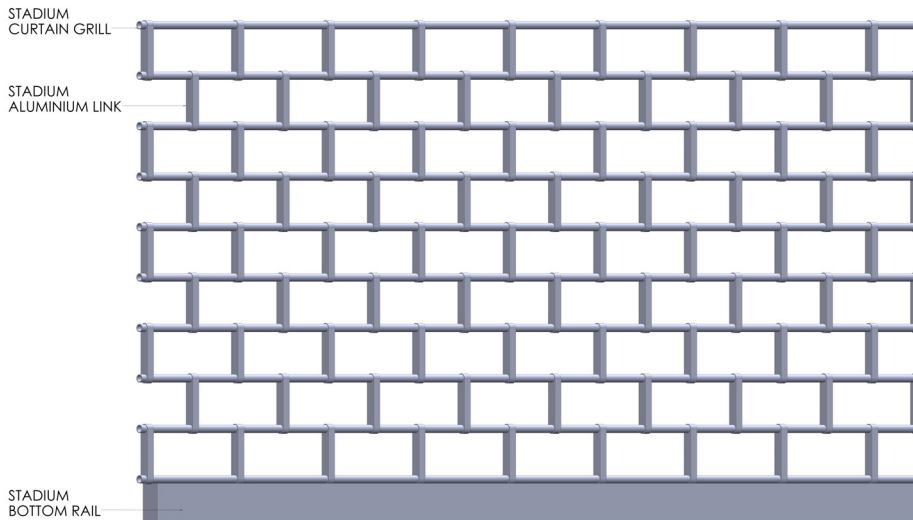

Technical Highlights

- 12mm aluminium tubes with high-strength nylon links
- Brick-pattern grille design for visual appeal
- Lightweight structure for smooth manual operation
- Manual or motorised drive options
- Optional waist-high or concealed locking systems
- Low-maintenance, corrosion-resistant aluminium construction
- Suitable for openings up to 3.6m high x 3.6m wide (manual)

ARCO SPECS

Stadium Grille

Lightweight aluminium roller grille for secure retail and hospitality applications.

Standard

- Heavy-duty aluminium roller grille designed for high-security commercial and public facilities
- 19mm extruded aluminium tubing with reinforced link connectors in a brick-like pattern
- Capable of spanning large openings up to 4.5m high x 8.0m wide in a single span
- Suitable for manual or motorised operation with multiple control options
- Finishes: clear anodised aluminium or custom powdercoating

Performance & Compliance

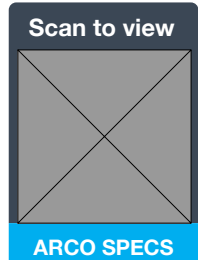

- High-strength design provides reliable security in high-traffic commercial environments
- Maintains airflow, visibility and natural light while securing large openings
- Quiet operation with optional buffers reduces operational noise
- Engineered for heavy-duty use in shopping centres, sports facilities, car parks and other public areas
- Corrosion-resistant aluminium construction ensures long-term durability

Application

- Large retail shopping centres
- Car park access and entry points
- Sports arenas and stadiums
- Public facilities requiring secure, high-traffic access control
- Venues needing a combination of visibility, airflow and high-security protection

Technical Highlights

- 19mm extruded aluminium tubes with reinforced link connections for maximum strength
- Brick-pattern grille design for robust security and aesthetic appeal
- Manual or motorised drive options with flexible control systems
- Optional rubber twin fin or mohair felt buffers for quiet operation
- Designed for smooth operation across very large openings
- Low-maintenance, corrosion-resistant aluminium construction
